

Dear Members,

HSIAS is glad to inform members the new version of the CHPs Classification Tool is now available. It has the option of capturing the responses, providing them in a summary document, together with the classification of the product, and emailing the outcome to the user. The user just need to provide a valid email and submit the request to receive a system-generated PDF copy of the response and outcome. The PDF copy will be automatically emailed to the user.

In addition, this version of CHPs Classification Tool can also be accessed on the mobile devices. This QR will lead you directly to the tool.
